Christian Geovanni Cárcamo Mojica

WORK EXPERIENCE

- **Freelancer: System's Barber Shop (December 2024 – May 2024)**
    - Developed a C# and WPF application using hexagonal architecture, Entity Framework ORM, and SOLID principles.
    - Designed an affordable solution for small barbershops, featuring a customer interface for selecting services and products.
    - Implemented sales tracking, inventory management, and automated weekly sales reports via email.
    - - Reduced inventory errors by 40% and improved sales process efficiency by 30%.

- **Freelancer: Veterinary System (2024 March – November)**
    - Built a Java Spring application from scratch, utilizing MVC and hexagonal architecture for scalability.
    - Integrated JWT for secure authentication.
    - Decreased patient registration and access times by 35%, significantly enhancing the user experience.

- **Computer Technician in "Space Tech" (2020 December-2022 February).**
    - Performed preventive maintenance on computers.
    - Installed operating systems and assembled electronic equipment.

EDUCATION

- 3rd-Year Computer Systems Engineering Student
  Universidad Católica de El Salvador (Currently Enrolled).

- Certified Junior Developer Programmer
  ALURA, 2023.
- Technical Baccalaureate in Technological Infrastructure and Computer Services.
  Instituto Nacional de El Congo, 2022.
